Yeremia Chris Saragi

Software Engineer (Frontend-Heavy)

yeremia997@gmail.com | yeremiachris.com | linkedin.com/in/yeremia-chris-saragi | github.com/yeremiaChris

SUMMARY

Software Engineer with nearly 5 years of experience building production web platforms across health-tech (HIS/EMR) and logistics. Strong in modern frontend (React, Next.js, Vue) with solid experience integrating REST/GraphQL APIs, authentication flows, and data systems. Track record shipping 150+ components and pipelines while sustaining sub-100ms interaction performance and 99%+ uptime at national scale. Focused on performance, clean architecture, and shipping reliable products.

Core Skills: React, Next.js, Vue, Nuxt, TypeScript, GraphQL, FHIR, REST APIs, Tailwind CSS, Git, Agile

PROFESSIONAL EXPERIENCE

Frontend Web Developer — PT Cipta Medika Informasi (PrimaKu) **Dec 2022 – Present**

Jakarta, ID (Remote) | National health-tech platform endorsed by the Indonesian Pediatric Society (IDAI), supporting early childhood health monitoring for clinicians and families nationwide.

- Built frontend architecture for consumer growth platforms and clinical portals using React and Next.js (App Router), achieving 42ms average interaction latency (INP) and 99.4% Core Web Vitals pass rate
- Built Next.js (App Router) pages with SEO-friendly rendering and metadata for public-facing growth pages
- Developed accessible design-system components synced with multi-brand Figma tokens, used across a national platform whose consumer app has 1M+ Google Play downloads
- Implemented REST API integrations, token-based authentication flows, and third-party pediatric telemetry streaming, maintaining 88%+ test coverage
- Improved team practices around code reviews, linting standards, and Agile processes

Tech: React, Next.js (App Router), TypeScript, Tailwind CSS, REST APIs, Jest/RTL

Frontend Engineer — Mazecare **Jun 2025 – Jul 2026**

Indonesia (Remote) | Full-time | AI-native Clinic & Hospital Information System (EMR/HIS), FHIR-compliant, covering the full patient lifecycle from registration through billing and insurance.

- Built features spanning the patient lifecycle: registration, scheduling, clinical visits (diagnosis, notes, prescriptions, procedures), care episodes, teleconsultation, queues, digital consent forms, medical imaging, and billing workflows
- Shipped AI clinical-assistant capabilities, including speech-to-text and AI-assisted medical note drafting with diagnosis/prescription suggestions during encounters
- Delivered AI configuration tools — natural-language builders for encounter templates, dashboards, and workflows — plus intelligent document processing for billing and insurance data extraction
- Integrated FHIR & GraphQL APIs with standardized clinical coding for third-party and payor integrations

Tech: Vue 3, Nuxt 3, TypeScript, GraphQL, FHIR

Frontend Web Developer — PT Selalu Siap Solusi (KiriminAja) **Jan 2023 – Apr 2024**

Yogyakarta, ID (Onsite) | Multi-courier parcel aggregation platform handling bulk cargo, instant transit, and multi-tier e-commerce fulfillment across Indonesia.

- Developed logistics control-room interfaces using Vue.js and Nuxt.js, including real-time pricing across 15+ domestic couriers with sub-85ms query response
- Built high-density parcel-manifest and batch barcode-scanning interfaces processing 50K+ daily shipping labels, using Web Workers and virtualized lists
- Implemented efficient state management with Pinia and Vuex for courier calculation caching and live shipment tracking, supporting 99.98% platform uptime
- Collaborated with operations and QA on performance benchmarks and incident handling

Tech: Vue.js, Nuxt.js, Pinia/Vuex, Tailwind CSS, REST APIs

Frontend Web Developer — PT Idekreatif Menusa Teknologi (iCreativeLabs) **Jan 2022 – May 2023**

Indonesia (On-site) | Digital transformation consultancy delivering enterprise web and mobile applications.

- Built client-facing web applications, admin dashboards, and hybrid mobile interfaces using React, Next.js, Vue, and React Native
- Delivered pixel-accurate responsive interfaces from complex client Figma designs
- Implemented payment-gateway integrations (Midtrans, Xendit), complex state management, and multilingual support (i18n)
- Worked in fast client sprints and handed off production-ready code to internal teams

Tech: React, Next.js, Vue, Nuxt, React Native, Tailwind CSS

SKILLS

Languages: TypeScript, JavaScript, HTML5, CSS3

Frontend: React, Next.js (App Router), Vue 3, Nuxt 3, React Native, Tailwind CSS, Design Systems

State & Data: REST APIs, GraphQL, FHIR, React Query, Pinia, Vuex, Axios

Testing & Quality: Jest, React Testing Library, Core Web Vitals

Tools: Git, Jira, Node.js, CI/CD (Vercel), Figma

Practices: Agile, Code Review, Accessibility (WCAG), i18n

EDUCATION

Bachelor of Information Systems

Universitas AKI (UNAKI) | 2018 – 2022 | GPA: 3.60 / 4.0
